

# **RANDOLPH SOCCER CLUB**

Health & Safety  
Reminders  
Fall 2020

---

# Webinar Agenda

- Review our protocol for attending RSC activities during the current public health situation.
- Review what players should bring to training.
- Review new electronic RSC Daily Health Questionnaire platform.

# Current Protocol for RSC activities

- Players/parents/siblings, etc. must wear a mask/face covering during transition times around RSC activities.
- Please follow physical distancing requirements whenever possible during transition times/when waiting for your player outside of your car or to move into your session at the field.
- Please arrive to the field no more than 30 minutes prior to your training session and exit the park promptly after your trainer releases your player from the session.

# Current Protocol continued

- Players should make every effort to make any bathroom stops prior to reporting to the field for a training session.
- On-field activities during sessions will resemble sessions pre-pandemic, an approach which is in line with current CDC, state & local guidelines. However, players will be expected to distance physically when not engaged in aerobic activities/for off-field aspects of sessions. . . for example, water breaks or when taking a turn out during a scrimmage.
- No group celebrations, high-5s, hugs, handshakes, fist-bumps, etc. should take place.

# What Players Must Bring to Training

For every training session, please bring in a labeled bag:

- . . . your own labeled soccer ball,
- . . . your own hand sanitizer,
- . . . plenty of water for yourself in a labeled bottle.

Be sure to wear shin guards, as usual.

**PLUS. . . YOU WILL NEED YOUR NEW ELECTRONIC  
“ENTRY TICKET” . . .**

# RSC's New Electronic DHQ Platform

- Instead of the hard copy Daily Health Questionnaires we have been using since Returning to Play, RSC is moving to an electronic platform.
- The link to RSC's electronic Daily Health Questionnaire is posted at the top of the club's website. It will be included in the email blast that goes out to RSC families about this webinar, along with being embedded in the article about this webinar on our website.
- Via this link, parents must complete an electronic Daily Health Questionnaire prior to every RSC activity. This includes RSC players & coaches attending an away game, along with opposing players & coaches playing a game on an RSC field.

# RSC's New Electronic DHQ Platform continued

- Successful completion of the DHQ will result in a Green Go screen with your player's name and the date for which he/she is cleared to attend.
- Players or a parent for anyone without a device will be required to show their respective Green Go screen for that date to their trainer upon arrival to a training session. For a game, their Green Go screen can be shown to the trainer or a rostered Assistant Coach.
- The Green Go screen is the required entry ticket for each player for each session. A screenshot of a player's Go screen can be used as needed in the event of carpooling or a sitter bringing a player to a session.

# RSC's New Electronic DHQ Platform Demonstration

- This Link will take you to RSC's electronic DHQ:  
<https://randolpscnj.typeform.com/to/ZxjrOqUQ>

Screen sharing will allow you to view a preview of completing one with me now.

# Final Thoughts

- It is essential that you are honest and transparent with the club. We need your support in terms of respecting RSC's protocol and modeling appropriate behavior for players.
- Tammy McConnell, RSC's President, is the point person for the club's Health & Safety efforts. She can be reached at [randolphsc.nj@gmail.com](mailto:randolphsc.nj@gmail.com). Please notify her immediately if your player becomes ill or if possible COVID-19 exposure issues arise for your family.

Thank you for your support as we navigate these challenging times.
